

I am writing this statement to request of waiver of the registration fees for the 2021 SIAM Computation Sciences and Engineering conference. I am requesting this waiver as I am a Ph.D. student in my final year of study, and any assistance in attending this conference is very helpful and appreciated.

I am also very interested in attending this conference. I am interested in attending this conference as it will be an excellent source of information related to my field of study, computational PDEs. Specifically I am interested in attending MS152, Advanced Developement on Computational Methods for Kinetic Theory, MS283, High-Performance PDE Solvers, and MS299, A Deep Dive into Shallow Water. It will also be an excellent opportunity to network as I am in the middle of searching for jobs.

I am also scheduled to give a talk at this conference. My presentation is titled *Nonconservative Discontinuous Galerkin Method for Generalized Shallow Water Equations on a Sphere*. It is coauthored by my advisor, James Rossmann, of Iowa State University. Originally this presentation was submitted as a contributed talk, but has now been scheduled as part of minisymposium 311, Exascale Applications for High-Order PDE Solvers. The organizers of this minisymposium are MiSun Min and Paul Fischer.

Best Regards,
Caleb Logemann
